

OlympianPT

Adaptive Physical Therapy
Board-Exam Excellence and Mastery in Practice

- ✓ *Excel in strengths*
- ✓ *Overcome weaknesses*
- ✓ *Reach the Olympian-PT Podeum* 

Problem

- **Static finite random question banks** quickly become outdated
- No personalized remediation or adaptive support
- Schools lack actionable data to support entire cohorts
- Prep providers face high student churn and costly content updates
- Demand for physical therapists outpaces supply
- Competition for top clinical talent is rising
- Passing NPTE is not a predictor for succeeding on the first job

Inspired by Olympic athletes' relentless spirit to rise after each fall, and from personal rehab experiences:

» **OlympianPT motivates** PT candidates to persevere and achieve their peak potential so they can help others heal, move, and enjoy life to the fullest!

This 🤘 is our mission!

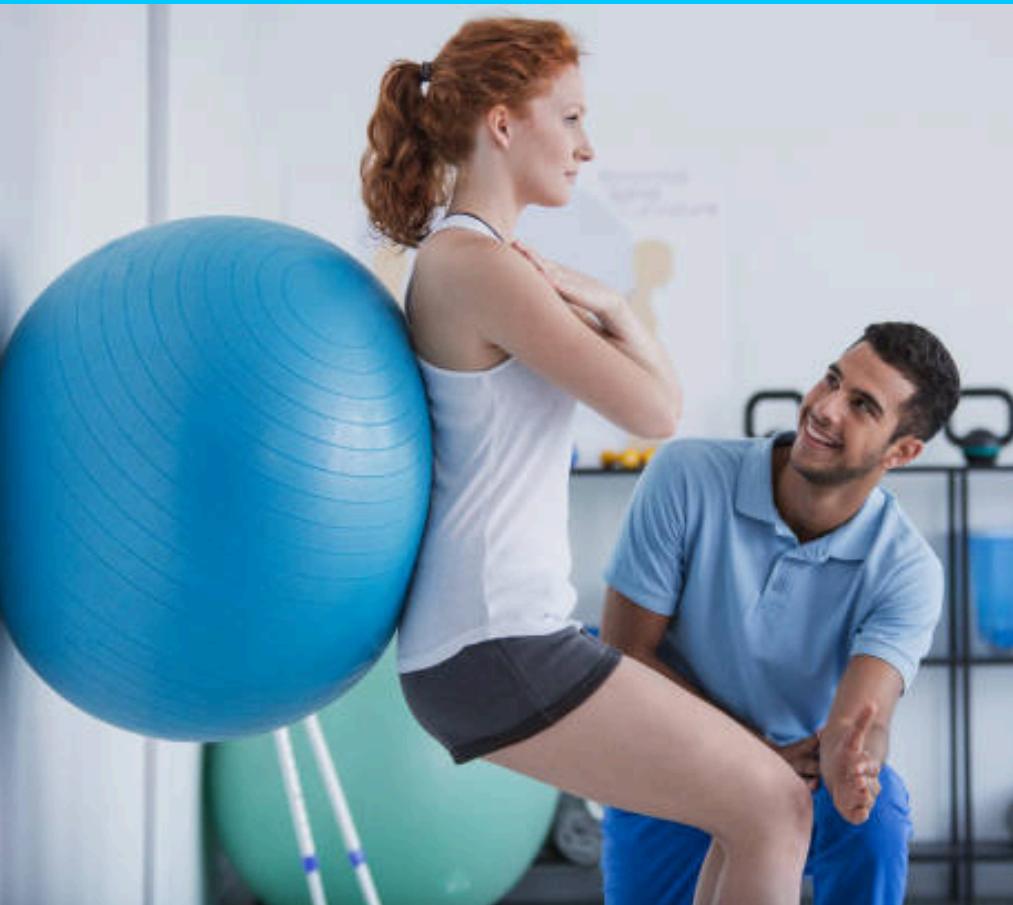

Our Solution

Your Competitive Advantage !

OlympianPT

- ✓ AI-powered Adaptive on-demand learning app
- ✓ Empowering PT candidates to master their boards
- ✓ Personalized dynamic practice, tailored to each student's unique needs, with constructive feedback
- ✓ Launchpad for future success
- ✓ Inspiration → Aspiration → Motivation → Action!

Key Features

- **Diagnostic assessments** identify strengths and weaknesses.
- **Personalized on-demand** practice questions continuously expanding and clear explanations.
- **Adaptive system** tracks progress and optimizes study paths in real time.
- **Analytics dashboard** empowers schools and providers with actionable insights.

Market Opportunity

Large institutional market

- ~20,000 PT students graduate per year in the U.S.
- ~294 accredited DPT programs + ~4000 degree-granting postsecondary institutions in USA
- ~82% first-time NPTE pass rate in 2024, →~4000 fail, more than all of 3881 DPTs in CA
(compare: TX 2405, NY 1854, FL 1600)
 - Clear room for improvement and strong school incentives
 - Passing exams does not guaranteed excellence in workplace

Expansion potential

- Occupational Therapy (OT): ~9,000 graduates/yr
- E.g.: Accounting (CPA exam): ~72,000 candidates/yr
- Law (bar exam): ~35,000 graduates/yr
- Other Health boards

Continuing Education

- Practicing professionals renewing license

Market Strategy

Value to Universities & Colleges

- Built to maximize individualized readiness for board success
- Empower faculty to deliver targeted support across all cohorts
- Deliver actionable analytics for curriculum improvement and accreditation
- Strengthen reputation and attract top student applicants

Value to Prep Providers

- Differentiate and elevate brand with advanced adaptive offerings
- Reduce content development costs
- Gain actionable analytics to enhance student performance and attract new enrollees

Value to Individuals

- Personalized, self-paced preparation for board success
- Mobile  app for learning and reference on-the-go
- Flexible membership options to fit any schedule

Road Map & Business Model

Y1: ➔ Pilot **partnerships** with **regional** Universities, Colleges, and early Prep providers

- Annual institutional licensing or per-student subscription for schools
- Revenue share or per-seat licensing (**B2B**) for Prep providers

Y2: 🌎 Expand strategic **partnerships** to **national** Universities and key Prep providers

Y3: 🚀 Scale to additional domains, e.g. health, accounting, legal

Y4: ✨ Optional future expansion:

- individual (**B2C**) **memberships** for students and practicing professionals for on-the-go reference and learning
- **freemium** model with in-app upgrades

A patient presents with pain and swelling in their foot. What is the first assessment priority?

- A. Order x-ray
- B. Check vital signs
- C. Perform ECG
- D. Administer oxygen

Correct! X-ray is important for evaluating bone density and fracture risk, but not the first priority in this patient presentation with pain and swelling in their foot.

A patient presents with chest pain, shortness of breath, and palpitations. What is the PRIMARY assessment priority in this patient evaluation?

- A. Perform ECG
- B. Administer oxygen
- C. Check vital signs
- D. Order chest X-ray

✗ Incorrect. ECG is important for cardiac assessment but comes after vital signs. The correct answer is: B. Administer oxygen. Correct. Vital signs assessment is always the first priority in any patient evaluation.

Application Security

How We Secure Our Mobile App

- ✓ • Apply secure coding practices and regular code reviews
- ✓ • Encrypt all sensitive data at rest and in transit (e.g., HTTPS, secure local storage)
- ✓ • Implement strong authentication and secure session management
- ✓ • Use code obfuscation and tamper detection to prevent reverse engineering
- ✓ • Maintain strict dependency management and timely security patches
- ✓ • Conduct regular penetration testing and external security audits
- ✓ • Provide ongoing monitoring and rapid incident response capabilities
